

Patio Door

Block the Cold...

Curtains of hot air maintain the room temperature by blocking the drafts of cold air from large windows and patio doors. A warm air curtain is created to preserve the warmth in your house. Ideal for uses where lower temperature heater surfaces are required.

Colour: White or Almond.
Construction: 18 gauge box.
Protection against overheating.
Power: 500 to 2000 Watts.
Voltage: 208, 240, 347 and 600 volts.

Element : Stainless steel centre fixed tube with floating edges in a nylon sleeve to eliminate the noise of the expanding and contracting metal throughout the heating cycles.

Warranty - 10 years warranty on the electric heating element applies to the initial end user;
1 year on the other components.

Remove the "W" from the part number for the almond units. The units design for 240v can function at 208v, the result will be 75% of the original power (ex: 500w = 375w).

For ordering, add the voltage to the part number.
Ex: for 500w/240v white the number would be: PSW-05-240.
